Dear Sir/Madam:

Application for a Department of the Army Permit (PODCO 2173)
Waterfront at Aloha Towers
Honolulu Harbor, Oahu

The Environmental Center has conducted a brief review of the above referenced document.

The project was the subject of a full Environmental Impact Statement (EIS). The activities proposed in this PODCO appear to be within the scope of that analysis, and we offer no further substantive comments on the project at this stage.

However, according to the last published edition of the Office of Environmental Quality Control (OEQC) bulletin (23 January 1991), the Final EIS has yet to be accepted. The issuance of any permits prior to this would appear inappropriate.

We appreciate the opportunity to comment on this project, and hope that our suggestions will prove helpful in your review.

Yours truly,

John T. Harrison, Ph.D.
Environmental Coordinator
